Provider ID 219305

GUEST SPEAKER 

2018 Learn at the Loaf Speaker

Dr. Douglas Laliberte

Meet our Guest Speaker...

Dr. Doug Laliberte grew up in Winslow, Maine and graduated Cum Laude from Colby College with a BA in Environmental Policy and Chemistry. He graduated Summa Cum Laude from Tufts Dental and there gained entrance into the OKU National Dental Honor Society.

He was awarded the ADA Foundation Scholarship, two OKU Scholarships and additional awards for ethics and professionalism.

After completing dental school in 2009, Dr. Doug began practicing dentistry in his hometown at the Community Dental Center where he practiced public health dentistry. In 2010, Dr. Doug returned to Tufts University for a residency in orthodontics. There, his research was focused on oral hygiene in orthodontics. In the latter portion of his residency he began construction of Granite Coast Orthodontics in the beautiful community of Rockport, Maine. He received his certificate in Orthodontics and Dentofacial Orthopedics in June of 2012 and began practicing that summer.

In private practice Dr. Doug has maintained a strong commitment to continuing education. He has an emphasis is on using efficient treatments and modern mechanics that improve his patients' experience and provides ideal functional with cosmetic outcomes.

Since 2013 he has been president of the Midcoast Dental Society and in the fall of 2017 he was Board Certified by the American Board of Orthodontics.

Dr. Doug is soon to celebrate his 5 year anniversary with Rebecca Laliberte and they are the proud parents of two beautiful boys, Wyatt and Owen.

Together they are committed to their family and enjoy lots of mini adventures with their young boys.

We look forward to seeing you all at the meeting and on the slopes at "The Loaf".

REGISTER 

Course Learning Objectives and Outline

Learning Objectives

- Understand malocclusions and the importance of treatment timing and methods
- Recognize changes and trends in orthodontic treatment today
- Develop an understanding of Temporary Anchorage Devices (TADs) and their design, use, benefits, and drawbacks
- Become familiar with invisalign and clear aligner systems
- Understand the role of CBCTs in orthodontics. Are they becoming standard of care?
- Critically view multi-disciplinary cases

Course Outline

- Review incidence, etiology and treatment timing of transverse, anterior-posterior and vertical discrepancies
- Highlight common dental anomalies and their management
- Review of adult treatment and complexities
- Discuss TAD design and how these “temporary implants” are used in orthodontics
- Introduce how CBCTs are improving patient care
- Discuss invisalign’s place in orthodontics
- Become acquainted with methods to accelerate tooth movement
- Present some complex and multidisciplinary cases
